

Objective: REVIEW

## Integers, Absolute value

**Integers** include the counting numbers (1, 2, 3, ...), their opposites (-1, -2, -3, ...), and zero. The number line below shows the integers from -5 to 5. Negative integers have values less than zero, so they are to the left of zero on the number line. Positive integers have values greater than zero, so they are to the right of zero on the number line. Zero is neither negative nor positive.

The **absolute value** of a number is its distance from 0 on a number line. Since a distance must be either a positive number or zero, the absolute value of a number is always a positive number or zero. The absolute value of a number  $x$  is written as  $|x|$ . The integers -4 and 4 are opposites. You can use the number line below to see that each number is the same distance from 0. So,  $|-4| = 4$  and  $|4| = 4$ .

Use the number line for questions 1 and 2.

- Which point on the number line is represented by  $-7$ ?
  - point  $A$
  - point  $B$
  - point  $C$
  - point  $D$
- Which integer is represented by point  $E$ ?
  - $-3$
  - $-2$
  - $2$
  - $3$
- Which situation can be represented by the integer  $10$ ?
  - a temperature drop of  $10^{\circ}\text{F}$
  - 10 seconds before takeoff
  - a growth of 10 centimeters
  - a fall of 10 feet
- Which situation would you represent with a negative integer?
  - a mountain climber descending a mountain
  - a price increase
  - a person winning a sum of money
  - an elevator going from the 2nd floor to the 5th floor
- New Orleans has an elevation of 7 feet below sea level. How is that elevation, in feet, represented as an integer?
  - $-17$
  - $-7$
  - $7$
  - $177$
- What is the opposite of  $-13$ ?
  - $31$
  - $13$
  - $-3$
  - $-31$

7. What is the opposite of 40?

- A.  $-40$
- B.  $-4$
- C.  $4$
- D.  $40$

8. What is another way to write  $-(-9)$ ?

- A.  $-99$
- B.  $-9$
- C.  $0$
- D.  $9$

9. Use the number line below.

- A. Plot and label point  $J$  at  $-8$ , point  $K$  at  $6$ , point  $L$  at  $-1$ , and point  $M$  at  $4$ .
- B. Point  $N$  is the opposite of point  $J$ . Plot and label point  $N$  on the number line above. Explain how you found the opposite of point  $J$ .

---

---

---

10. Look at the number line.

Draw a line from each location to its point.

- |         |   |   |           |
|---------|---|---|-----------|
| A. $-6$ | ● | ● | point $A$ |
| B. $1$  | ● | ● | point $B$ |
| C. $-8$ | ● | ● | point $C$ |
| D. $4$  | ● | ● | point $D$ |
| E. $-2$ | ● | ● | point $E$ |

11. Select True or False for each statement.

- A. A temperature drop of  $8^{\circ}\text{F}$  is represented by the integer  $-8$ .  True  False
- B. Eight miles per hour is represented by the integer  $-8$ .  True  False
- C. A growth of 8 inches is represented by the integer  $-8$ .  True  False
- D. Descending 8 feet is represented by the integer  $-8$ .  True  False
- E. Eight feet below sea level is represented by the integer  $-8$ .  True  False

12. Select every true statement.

- A. Point  $A$  is located at  $-9$ .
- B. Point  $B$  is located at  $-7$ .
- C. Point  $C$  is located at  $-5$ .
- D. Point  $D$  is located at  $-3$ .
- E. Point  $E$  is located at  $1$ .

1. Which point represents a number with an absolute value of 1?

- A. point *A*  
B. point *B*  
C. point *C*  
D. point *D*
2. Which statement best describes  $|-72|$ ?
- A. the distance from  $-72$  to  $72$  on a number line  
B. the distance from  $-7$  to  $-2$  on a number line  
C. the distance from  $-7$  to  $2$  on a number line  
D. the distance from  $-72$  to  $0$  on a number line
3. A scientist stores liquid nitrogen at a temperature of  $-331^{\circ}\text{F}$ . Exactly how many degrees Fahrenheit below  $0^{\circ}\text{F}$  is the liquid nitrogen?
- A. 331  
B. 31  
C. 0  
D.  $-331$

4. Which point or points on the number line represent numbers with absolute values of 4?

- A. points *J* and *N*  
B. points *K* and *M*  
C. points *K* and *N*  
D. points *L* and *N*
5. Lorraine's checking account has a balance of less than  $-\$200$ . Which statement is true about how much Lorraine owes the bank?
- A. Lorraine owes exactly  $\$200$ .  
B. Lorraine owes exactly  $-\$200$ .  
C. Lorraine owes less than  $\$200$ .  
D. Lorraine owes more than  $\$200$ .

**Use the information for questions 6 and 7.**

Max is a diver. He uses positive numbers to represent elevations above the water's surface and negative numbers to represent elevations below the water's surface. Max is standing on a springboard. He represents his location as 3 meters. He lets a ring drop to the bottom of the pool. He represents its location at the bottom of the pool as  $-4$  meters.

- |  |  |
|--|--|
| <p>6. If Max dives into the pool from the springboard, how many meters will he fall vertically before he reaches the water's surface?</p> <p>A. 4 meters                      C. <math>-3</math> meters<br/>B. 3 meters                      D. <math>-4</math> meters</p> | <p>7. How many meters below the surface of the water is the ring?</p> <p>A. more than 4 meters<br/>B. less than 4 meters<br/>C. exactly 4 meters<br/>D. exactly 3 meters</p> |
|--|--|

8. A football coach recorded the results of his team's first 4 plays in its last game. The table below shows his data.

**Football Plays**

Play	Number of Yards
1	8
2	$-2$
3	5
4	$-7$

- A. During which play did the team lose the fewest yards? Use what you know about absolute value and the number line below to explain how you determined your answer.

---

---

- B. During which play did the team gain the most yards? Use what you know about absolute value and the number line above to explain your answer.

---

---

9. Select every point that has an absolute value of 2.

- A. Point *A*  
B. Point *B*  
C. Point *C*  
D. Point *D*  
E. Point *E*
10. Select True or False for each statement.
- A.  $|-58|$  is equal to the distance from  $-58$  to  $58$  on a number line.  True  False  
B.  $|-58|$  is equal to the distance from  $0$  to  $58$  on a number line.  True  False  
C.  $|-58|$  is equal to the distance from  $0$  to  $85$  on a number line.  True  False  
D.  $|-58|$  is equal to the distance from  $-58$  to  $0$  on a number line.  True  False
11. Walter's checking account has a balance of  $-\$32$ . How much does Walter owe his bank, in dollars?

Walter owes the bank 

-32
0
32

.

LESSON SE 1b

Objective

Use a number from the box to complete each sentence.

- The opposite of 5 is \_\_\_\_\_.
- The opposite of  $-25$  is \_\_\_\_\_.
- The opposite of  $-(-5)$  is \_\_\_\_\_.
- The opposite of 25 is \_\_\_\_\_.
- The opposite of  $-(-25)$  is \_\_\_\_\_.
- The opposite of  $-5$  is \_\_\_\_\_.

Look at each statement. Is the statement true? Select Yes or No.

- A. The speed of a biker is represented by a positive integer.  Yes  No
- B. A price decrease is represented by a positive integer.  Yes  No
- C. The amount of money that a person earns is represented by a negative integer.  Yes  No
- D. The altitude of a scuba diver under sea level is represented by a negative integer.  Yes  No

Use a number from the box to complete each sentence.

- Point *A* has an absolute value of \_\_\_\_\_.
- Point *B* has an absolute value of \_\_\_\_\_.
- Point *C* has an absolute value of \_\_\_\_\_.
- Point *D* has an absolute value of \_\_\_\_\_.
